Carol Lafond
For Muskeg Lake Council

I am the daughter of Alpha (Venne) and Bert Lafond and have lived on Muskeg Lake most of my life - where my grandparents also lived.

My home and heart is Muskeg, I have 6 children, 7 grandchildren, 4 brothers and many nieces and nephews and share with them my love for our Nation.

After obtaining a Bachelor's degree in Education I've gained a lifetime of experiences at the band level as Post Secondary counselor and health director.

Carol for Council

Creeating the Change.

Carol Lafond
Creeating the Change.

Change is Ongoing.

What hasn't Changed is our language, culture and traditions. These must ground us as we, as a collective, make decisions for the future.

Important time to work with our membership and recognize and celebrate its diversity and the spaces we are in all over the country and how we can collaborate for a better future.

Thinking about our future means thinking of the land, the water and the air because we know that sustains us.

Protections and thoughtful approaches to what that means - is it land management? Is it water protection?

What does our community need to prepare for the next generations? **What kind of good ancestors do we need to be?**

Why support my candidacy

- I've seen and been a part of many changes in our community, we have been through many changes and change is ongoing.
- Our traditions, language and culture don't change instead it grounds us as a collective, as individuals for our families and our Nation.
- It's an important time to work with our membership to recognize and celebrate the strengths of our membership, honour the treaty and unceded territories we are in to collaborate for a better future.
- We are at a time when actions matter more than words. We were gifted the land, water and air and we are told these gifts come with responsibilities that require our protection for our future generations.
- Thoughtful + collaborative approaches are necessary for decision making from citizenship, land management, water protection, our governance processes and relationship building.
